SUBJECT: CHANGE IN MC&A LICENSING REVIEWER

Dear Mr. Sharkey:

Dr. Richard Milstein, the Nuclear Regulatory Commission material control and accounting (MC&A) licensing reviewer for your facility, has been transferred to another branch within our division. As a result, Mr. Donald Joy will be assuming the responsibility of being your MC&A licensing reviewer. Mr. Charles Gaskin remains as your physical security licensing reviewer, and I remain as the NMSS project manager for your facility.

Mr. Joy has already been in telephone contact with Mr. Hal Eskridge of your staff regarding a site visit to discuss needed revisions to your Fundamental Nuclear Material Control Plan, and to become more familiar with your operations. It was agreed that November 1-3, 1994 would be a suitable time for Mr. Joy's site visit. Mr. Joy can be reached at (301) 415-8135.

As a reminder, with regard to future correspondence to the NRC, please identify and mark accordingly, documents that you believe contain proprietary information which should be withheld from public disclosure pursuant to 10 CFR 2.790. Documents which are not marked may be inadvertently placed in the Public Document Room (PDR).

Sincerely,

Original Signed By:
