Subject: General Electric Company Application for Final Design Approval and Design Certification of ESBWR Standard Plant Design – DCD Revision 1 Status, Supplement 1 (TAC # MC8168)

The purpose of this letter is to provide additional information regarding GE's schedule for submitting Revision 1 of the ESBWR DCD. In the Reference 3 letter, GE stated the following:

“In the Reference 1 letter, GE submitted its application for Final Design Approval and Standard Design Certification for the ESBWR Standard Plant Design. Following discussions with the NRC, GE subsequently submitted additional information in certain selected areas as requested by the NRC before the application could be formally docketed (Reference 2). GE is currently in the process of incorporating this additional information into the ESBWR DCD and plans to submit DCD Revision 1 on the following schedule:

- DCD Tier 2 (with the exception of Chapter 16 Technical Specifications and Bases) – January 31, 2006
- DCD Tier 2, Chapter 16 – February 28, 2006
- DCD Tier 1 – February 28, 2006”

In addition to the above, DCD Revision 1 will include the removal of the “Conditional Release” status from all Tier 1 and Tier 2 documents.

DD68

If you have any questions about the information provided here, please let me know.

Sincerely,

David H. Hinds
Manager, ESBWR
