SUBJECT: Addendum A to NRC License Termination Report for Seneca Army Depot Activity (NRC license SUC-1275)

Dear Mr. Kottan,

The United States Army is pleased to submit the additional information requested regarding the License Termination Report for Seneca Army Depot Activity (Parsons, 2004) in Romulus, New York. The Nuclear Regulatory Commission (NRC), in a phone call on October 18, 2005, clarified their request for the radiological survey data to be evaluated using the MARSSIM Scenario A null hypothesis (NRC, 2000). Per the NRC's request, Addendum A to the License Termination Report for Seneca Army Depot Activity has been prepared; Addendum A presents the results of the Scenario A null hypothesis evaluation.

The goal of the License Termination Report for SEDA, which follows the *Multi-Agency Radiation Survey and Site Investigation Manual* (MARSSIM; NRC, 2000) and other applicable guidance, is to demonstrate that the license termination requirements for NRC license SUC-1275 (NRC Docket No. 040-08526) have been met and to remove SEDA from Licenses SUC-1380, 45-16023-01NA, SUB-834, BML 12-00722-07, and STC-133.

We appreciate the opportunity to provide you with this additional information for a report that is of great importance to the United States Army. Should you have any questions regarding the document, please do not hesitate to contact me (607) 869-1235.

Sincerely,

Stephen M. Absolom
