Gentlemen:

The Nuclear Regulatory Commission, Division of Fuel Cycle and Material Safety, has issued a Negative Declaration and an Environmental Impact Appraisal related to the renewal of Special Nuclear Material License SM-33 for the continued operation of the Nuclear Fuel Fabrication Plant, Hematite, Missouri. Copies of the Negative Declaration, which has been forwarded to the Office of the Federal Register for publication, and the supporting Environmental Impact Appraisal are enclosed.

Sincerely,

Original Signed by
 Ralph G. Page

NEGATIVE DECLARATION REGARDING
RENEWAL OF LICENSE NO. SNM-33,
COMBUSTION ENGINEERING, INC.,
NUCLEAR FUEL FABRICATION PLANT
HEMATITE, MISSOURI
DOCKET NO. 70-36

The U.S. Nuclear Regulatory Commission (the Commission) is considering the renewal of Special Nuclear Material License SNM-33 for the continued operation of the Nuclear Fuel Fabrication Plant at Hematite, Missouri.

The Commission's Division of Fuel Cycle and Material Safety has prepared an environmental impact appraisal for the proposed renewal of license SNM-33. On the basis of this appraisal, the Commission has concluded that the environmental impact created by the proposed license renewal action would not be significant and does not warrant the preparation of an environmental impact statement and, accordingly, it has been determined that a Negative Declaration is appropriate. The environmental impact appraisal is available for public inspection at the Commission's Public Document Room at 1717 H Street, N.W., Washington, D.C. A copy may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Fuel Cycle and Material Safety.

Dated at Silver Spring, Maryland this 23rd day of November, 1982.

FOR THE NUCLEAR REGULATORY COMMISSION

R. G. Page, Chief
Uranium Fuel Licensing Branch
Division of Fuel Cycle and
Material Safety, NMSS
