Ms. Gabriel,

Yes. Both Dr. Richard Stock and Dr. Sheryl Green of the Department of Radiation Oncology, are authorized users (including the use of brachytherapy and high dose rate remote afterloader units) under the Broad Scope Radioactive Materials License (Human Use # 75-2909-04) issued to The Mount Sinai Hospital by the New York City Bureau of Radiological Health.

Shlomo Hoory, Ph.D.
Director, Radiation Safety

Subject: Question from NRC

To: Shlomo Hoory, Ph.D., Radiation Safety Officer, Mount Sinai Hospital, NYC license 75-2909-04

Would you please verify that the following two individuals are authorized to work under Mount Sinai Hospital's City of New York radioactive materials broad license as medical authorized users for 35.400-manual brachytherapy and 35.600-high dose rate remote afterloading:

Richard G. Stock, M.D. and Sheryl Green, M.D.

They signed a statement of attestation for an individual who completed a radiation oncology residency at your hospital.

thank you,

Sandy Gabriel
