Subject: RE: NARM material - International Isotopes Idaho, Inc.

Sorry to have missed your call. I have been out sick all week. Idaho does not have a state licensing program nor regulations for NARM or NORM materials. I would be happy to discuss where to go from here.

Subject: NARM material - International Isotopes Idaho, Inc.

Good afternoon Mr. Halverson,

I am a Sealed Source & Device (SSD) technical reviewer with the NRC. We recently received a request to add NARM material to International Isotopes' current Sealed Source & Device (SSD) certificate, NR-1235-S-102-S, for the Model BM06 series medical reference sources that they currently manufacture.

In light of the new provisions in the Energy Policy Act of 2005 regarding NARM material, we would like to set up a conference call with the appropriate person handling the licensing for International Isotopes Idaho, Inc., located in Idaho Falls, to discuss an approach on how to properly authorize the NARM material in the SSD certificate. Could you, or your appropriate staff member, please give me call to discuss further and set up a time for this call. My contact information is below.

Sincerely,

Jonathan Rivera
