Subject: FYI: Hematite has decided to delay building decommissioning until

They resolve all EMP RAIs.

Hank Sepp, WEC Project Director for Hematite, just called me and said that they need to catch their breath and ensure that stakeholders understand what is going on and feel comfortable with the environmental decisions.

He told me that he need to work some things out with the State of Missouri concerning the Building Demo Work Plan. He hopes that they will be able and ready to start building demolition some time in later in 2006 and feels that once the license amendment is granted and any conditions are met, they will be able to do some prep work an maybe even start work on certain building areas. He feels that it willnot really interfere with the DP schedule because the Building Demolition will take only a 1-2 of physical demo work. He wanted assurances that we would still work on evaluating the Building Demolition amendment request.

Westinghouse will start decreasing its work force in December, but will have some workers stay until end of January 2006 to address waste management issues.

I hope to discuss this with you inperson as soon as I can. If you have any questions, do not hesitate to contact me.
