SUBJECT: TERMINATION OF NRC RADIOACTIVE MATERIALS LICENSE  
NO. 21-26491-01

Dear Ms. Murdock:

In letter dated October 12, 2005 and an NRC Form 314 dated November 22, 2005, Dr. Breece contacted the U.S. Nuclear Regulatory Commission and indicated that he wished to terminate his NRC radioactive material license. The NRC staff has reviewed the final status surveys. Based on its review, the staff has concluded that all licensable radioactive material has been removed from the facility and residual radioactive material attributable to licensed activities does not exceed current NRC criteria.

Based on these conclusions no further remediation or actions with respect to NRC regulated material is required. The facility is suitable for unrestricted use and NRC license number 21-26491-01 is hereby terminated.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and the enclosure will be available electronically in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

If you have any questions, please call me at (630) 829-9842.

Sincerely,

A handwritten signature in cursive script, appearing to read "Toye L. Simmons".
