Re: Close-out survey for license # 21-26491-01.

A close-out survey was performed on October 11, 2005 of our G-4040 S. Linden Rd., Flint, MI, 48507 site, and is enclosed for your review.

The last date of receipt and use of radioactive material at this site was October 6, 2005 for Tc-99m. No other radioactive materials were used at this facility for imaging purposes.

A current copy of the leak test results for the sealed sources used at our facility is enclosed for your review. These sources include a Co-57 flood source, and Cs-137 for constancy and accuracy testing. These sources were removed from this location prior to performing the close-out.

We did not dispose of radioactive materials by release to sewers or incineration. In addition, there were no spills of any long-lived radioactive material or on-site burials of radioactive materials.

Please contact our physics consultant, Laura Luna of Medical Physics Consultants, Inc. at 734-662-3197, if you have any questions concerning these requests. Thank you again for your cooperation.

Cordially,

W. Breece, MD
