

MEMORANDUM TO AMS FILE NO.: RIII-95-A-094

FROM:

Gary L. Shear, *(initials)*
Chief, Fuel Cycle and Decommissioning Branch

R

SUBJECT:

TELECON WITH KIM JONES - USEPA

On Wednesday, August 23, 1995, I spoke with Kim Jones, Criminal Investigator with the EPA. Kim called to provide some feedback regarding the EPA's investigation status into the alleged transfer of sewage sludge to the St. Louis Metropolitan Sewer District that contained radioactive material. Kim indicated that she was in the very preliminary stages of the investigation and that the EPA was in the process of preparing a letter formally referring the concern to the NRC. I told Ms. Jones that we were planning an ARB and would likely propose that we followup on the information, already provided, soon. She stated that this would be no problem from her stand point and asked that we not mention her investigation to the licensee. I told her that we would not.
