Docket No. 70-36
License No. SNM-33

Mr. Robert M. Bernero
Director
Nuclear Material Safety and Safeguards
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Subject: Amendment to Hematite Fundamental Nuclear
Material Control Plan

Dear Mr. Bernero:

This letter transmits an amendment to the Fundamental Nuclear Material Control Plan (FNMCP) for our Hematite, Missouri Nuclear Fuel Manufacturing facility. This amendment incorporates, primarily, the changes to buildings and equipment made under our revitalization program and described in recent license amendment requests approved by the Nuclear Regulatory Commission through License Amendment No. 17, dated January 24, 1990. It also includes other minor updating revisions to the text.

We have determined that these changes do not decrease the effectiveness of the FNMCP and, as such, the changes have been implemented in accordance with the provisions of 10CFR70.32(c)(2)(ii).
