File Docket No. 70-0036 CE HEMATITE

Docket No. 71-0090

Mr. Charles E. MacDonald, Chief
Transportation Branch
Division of Safeguards and Transportation
Office of Nuclear Materials Safety
and Safeguards
U.S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, D. C. 20555

Subject: Quality Assurance Program for Shipping Packages

Dear Mr. MacDonald:

The approval for Combustion Engineering's current Quality Assurance Program for Shipping Packages for Radioactive Material expires June 30, 1989. Pursuant to the requirements of Subpart C of 10CFR71, we are submitting a revised program for Nuclear Regulatory Commission (NRC) approval.

The new program manual Enclosure has been substantially revised from the previously NRC approved manual. Because of the substantial revisions, all sections carry a new "Rev. 0" indication in accordance with our manual revision procedures. The greatest impact of the manual changes can be found in Section 1, Organization; Section 2, Quality Assurance Program; Section 3, Design Control; and Section 11, Test Control. Revisions to other sections essentially reflect only the organizational changes.

Following discussions with Mr. L. Gordon of your staff, we are transmitting four (4) uncontrolled copies of the subject Quality Assurance Manual. Also, enclosed is a check (No. 502175) in the amount of \$150.00 to cover the application fee required by 10CFR170.31.

R-19
