to C.E. MacDonald (NRC), dated
December 5, 1989

Dear Mr. MacDonald:

Pursuant to a conversation with Ms. Nancy Osgood of your staff, Combustion Engineering formally requests that the Nuclear Regulatory Commission temporarily suspend review of the Reference amendment requests pending receipt of a revised amendment package.

Combustion Engineering has determined that a modification to the design is necessary. Since the modification will invalidate materials provided in the Reference amendment packages, continued review of the packages would not be productive. Combustion Engineering has reformulated its submittal and a new amendment package will be submitted shortly.
