SUBJECT: FUNDAMENTAL NUCLEAR MATERIAL CONTROL PLAN

Dear Mr. Pierson:

Enclosed are three (3) copies of an extensive revision to the Fundamental Nuclear Material Control Plan (FNMCP) for the Hematite plant. This meets the commitment made in our MC&A Improvement Program Plan, submitted November 11, 1994, to extensively revise the FNMCP to reflect the current MC&A organization and plant operations, and to correct items that were identified during NRC Safeguards inspections. During his visit to Hematite on November 1-3, 1994, Mr. Don Joy of your staff made numerous recommendations for additional revisions to our FNMCP. These recommendations have also been included and the entire plan has been reformatted. The appendix (Part II) of the plan has been deleted, with pertinent information being incorporated into the body of plan, or moved to the critical procedures.

As we continue to implement our comprehensive MC&A improvement program, which includes review and evaluation of MC&A procedures and practices, additional revisions to the FNMCP may be necessary if needed changes are identified by this process. Please contact me at (314) 937-4691 ext. 319 if you have any questions.

Cordially yours,
