SUBJECT: Removal of Panoramic Irradiator Sources from the Georgia Tech Neely Nuclear Research Center

On December 14th 2005, the Neely Nuclear Research Center at the Georgia Institute of Technology completed the removal of the two hundred twenty-one (221) Co-60 sources requiring compliance with the June 6, 2003, "ISSUANCE OF ORDER FOR COMPENSATORY MEASURES". The removal of the sources was accomplished during 4 shipments as detailed below.

Shipment Date:	Number of Sources:	Shipped to:
11/10/05	86	University of California/Los Alamos National Laboratory
11/18/05	79	University of California/Los Alamos National Laboratory
12/1/05	55	University of California/Los Alamos National Laboratory
12/14/05	1	Southwest Research Institute

In addition to the shipment of the Panoramic Irradiator Sources, the Neely Nuclear Research Center has accounted for and has destroyed all SGI-M material as required by the SGI-M guidance.

Sincerely,

Dr. Nolan E. Hertel
Director, Neely Nuclear Research Center
Georgia Institute of Technology
