TOTAL CARRIED FORWARD TO 1ST PAGE (ITEM 17(H))					\$43,627.40	

ADDITIONAL TASK ORDER TERMS AND CONDITIONS

A.1 CONSIDERATION AND OBLIGATION

(a) The total estimated amount of this Task Order(ceiling) for the products/services ordered, delivered, and accepted under this contract is \$43,627.40. The Contracting Officer may unilaterally increase this amount as necessary for orders to be placed with the contractor during the contract period provided such orders are within any maximum ordering limitation prescribed under this contract.

(b) The amount presently obligated with respect to this Task Order is \$43,627.40. This obligated amount may be unilaterally increased from time to time by the Contracting Officer by written modification to this Task Order. The obligated amount shall, at no time, exceed the Task Order ceiling as specified in paragraph (a) above. When and if the amount(s) paid and payable to the Contractor hereunder shall equal the obligated amount, the Contractor shall not be obligated to continue performance of the work unless and until the Contracting Officer shall increase the amount obligated with respect to this Task Order. Any work undertaken by the Contractor in excess of the obligated amount specified above is done so at the Contractor's sole risk.

DELIVERY ORDER NO. DR-33-05-393
TASK ORDER NO. 001

Title: "Analysis of Current NRC Telecommunications Operational Support Contracts and Recommendation for Convergence of Services and Management"

Background: The NRC's Office of Information Services (OIS), Infrastructure and Computer Operations Division, Computer Operations and Telecommunications Branch, is responsible for the installation, maintenance, operation, and general support of the NRC's telecommunications systems, including all cable plant and associated systems and resources. In order to utilize its resources more effectively, the NRC must manage its telecommunications operational systems and supporting voice, data, and video communications.

Objective: The contractor shall provide an analysis of NRC's current telecommunications operational services contracts. This analysis shall include recommendations on how to manage these services in a more efficient manner from the aspect of resources and flexibility. The contractor shall also develop a recommendation on a methodology to initiate performance-based contracts, if practicable, for the agency's telecommunications requirements.

Requirements: Based upon market research of industry and other Federal Government best practices for telecommunications services and support contracts, the contractor shall provide the NRC with an analysis and recommendations paper to include, at a minimum, the following elements:

- Background on rationale for management of telecommunications services and support contracts as part of an agency's asset management approach
- Analysis of existing contracts' objectives
- Brief descriptions of the scope of each contract
- If performance-based contracting is determined to be feasible for NRC's telecommunications services and support contracts, the contractor shall:
 - Provide recommendations in terms of expected results rather than the method for performance of the work
 - Provide recommendations on measurable performance standards (i.e., terms of quality, timeliness, quantity, etc.) to assess work performance
 - Recommend an approach to quality assurance surveillance plans, as proscribed in Federal Acquisition Regulation [FAR] Part 46.103(a) and FAR Part 46.401(a) (also known as performance assessment plans)
 - Provide examples and recommendations of effective performance incentives and disincentives
- Provide examples and recommendations of deliverables for performance-based telecommunications services and support contracts
- Provide recommendations of "acceptance criteria" for deliverables of performance-based work under telecommunications services and support contracts
- Provide any additional guidance or references related to business re-engineering of the enterprise telecommunications support structure, which may benefit the agency in its development of statements of work for agency telecommunications services

and support requirements

Deliverables/Schedule:

Deliverables:	Estimated Delivery Schedule:*
Project Plan	2 weeks after award*
Project Schedule	3 weeks after award*
Determination regarding Performance-based applicability and Draft Recommendations Paper(s) as specified above	December 16, 2005*
Final Recommendations Paper(s)	December 31, 2005*

**These dates are estimated dates. Actual due dates are to be coordinated with the NRC Project Officer.*

Estimated Period of Performance: November 10, 2005 through December 31, 2005

Meetings/Travel: Only Local Travel is anticipated.

NRC Task Lead: The NRC Task Lead on this task order is:

George W. López
Sr. Telecommunications Specialist
Email: GWL@nrc.gov
Work: 301-415-7225
