Subject: Final Status Survey Plan for Section 2 of Whittaker Site Mail Control 137796

Kevin:

Good Morning,

I have reviewed Revision 1 of Final Status Survey Plan (FSSP) for Section 2 of the Whittaker site. This revision was provided in response to a request for additional information (RAI) we sent on October 18, 2005. One item we had questioned was the number of sample points for each survey unit, as had been stated in Section 2.1 "Surveys and sampling" of the FSSP. In Section 2.4 and in Appendix B of Rev 1 of the FSSP, you have addressed our comment related to only using the DCGL for thorium-232 in determining the Lower Bound of the Gray Region (LBGR). In those sections, you now state that each survey unit will have 11 samples. However, Section 2.1 still states that "each survey unit will have 9 sample points". This value is stated in both paragraphs 2 and 3 of this section. Additionally, in Section 2.1, you state that "the calculations for determining the number of samples is provided in Appendix A". However, the calculations are now provided in Appendix B of the FSSP.

Please provide a corrected section 2.1 to replace the current version. You may fax a new Page 8 of the FSSP with the necessary changes: 1. Correcting the number of sample points for each survey unit and 2. Referring to the appropriate Appendix containing the calculation for the number of survey units. Our fax number is 610-337-5269.

Upon receipt of the corrected page, I will re-scan the entire document into ADAMS with the new page, and utilize this version as the tie-down to the license.

If you have any questions on this RAI, give me a call.

Regards,
Marjorie
