Commissioner

December 23, 2005

United States Nuclear Regulatory Commission
Document Control Desk
Washington, DC 20555

Dear Sir:

**Subject: Hope Creek Generating Station
Docket No. 50-354
License Change Request H05-06
Removal of Performance Restrictions From
Surveillance Requirements**

PSEG Nuclear LLC submitted the proposed change to the Hope Creek Specifications by letter to the NRC dated October 11, 2005. The proposed amendment revises certain eighteen-month surveillance requirements by eliminating the condition that testing be conducted during shutdown conditions.

The BNE has no comments on the proposed change. If you need to discuss the subject further, please contact Elliot Rosenfeld at (609) 984-7548.

Sincerely,

Kent W. Tosch, Acting Assistant Director
Radiation Protection and Release Prevention Element
