Dear Secretary,

I am writing you to urge support of the petition for rulemaking from Committee to Bridge the Gap in order to upgrade reactor protections against terrorist attacks. I also oppose NRC's proposal to leave reactors unprotected against air & ground attacks. It seems reprehensible that government leaders, agencies & elected officials speak of trying to protect American lives & prevent additional terrorist attacks yet the government as a whole received failing grades from the 9/11 commission on such safety measure. Please support CBG's petition for rulemaking & upgrade protections against terrorist attacks--do something so that we Americans can truly feel safer rather than forcing us to just listen to words & empty rhetoric. Thank you.

Shannon Hart
