Subject: NRC / DOE Meeting for Moab RAP Review

Mike,

We have discussed having NRC / DOE meetings for the purpose of presenting specific sections of the Moab Remedial Action Plan in order to facilitate NRC review. We were wondering if it would work for you to schedule a meeting during the week of April 3, 2006 in order to review Appendix 2.0 Geology of the Moab RAP.

Appendix 2 is comprised of Calculation sets as follows:

Site and Regional Geology - Results of Literature Research

Site and Regional Geomorphology - Results of Literature Research

Site and Regional Geomorphology - Results of Site Investigations

Site and Regional Seismicity - Results of Literature Research

Site and Regional Seismicity - Results of Maximum Credible Earthquake Estimation and Peak Horizontal Acceleration

Additionally, results of the recent drilling work at Crescent Junction will be available for review: core analysis, packer/surge tests, and geophysical log analysis.

Pls let me know if NRC would be available for a meeting during the week of April 4, 2006.

Thanks,

Joel Berwick
