**RE: Final Radiological Status Survey Report
Building 7 and Sewer System Remediation
Former Lamp Manufacturing Facility
Bloomfield, New Jersey-License No. SMB-1527
Viacom Inc.**

Dear Mr. Roberts:

Viacom Inc. (formerly CBS Corporation) is submitting two copies of the Final Radiological Status Survey Report describing the decommissioning activities performed at the above referenced facility. Decommissioning activities completed in 1999-2000 included remediation followed by final surveys of the former Building 7 basement and portions of the storm sewer system. The decommissioning activities were performed under NRC License No. SMB-1527.

This report shows that radiologically impacted areas and structures have been remediated at the property and the final surveys are complete. The final survey results indicate that the property meets the site criteria for unrestricted release. Shortly after this submittal, Viacom anticipates requesting termination of License No. SMB-1527 and release of the property for unrestricted use. If you have any questions concerning the decommissioning activities, please contact Mr. Kenneth Bird at (412) 642-3287.

Respectively submitted,

Handwritten signature of Richard K. Smith in black ink.

Richard K. Smith, Director
Environmental Remediation
