**RE: RESPONSES TO SEPTEMBER 29, 1998 LETTER
BLOOMFIELD, NEW JERSEY FACILITY - ISRA CASE NO. 86070
CBS CORPORATION**

Dear Mr. Myers:

CBS Corporation (CBS) has reviewed the letter dated September 29, 1998 from New Jersey Department of Environmental Protection (NJDEP) concerning the Bloomfield New Jersey site. Based upon our review of the letter, CBS and NJDEP have agreed upon the remaining activities associated with the sewer system, groundwater conditions, DER, and schedule.

CBS and NJDEP have also agreed upon the soil investigation associated with petroleum hydrocarbons in Area of Concern C. NJDEP required additional delineation of VOCs in soil at location BW1-3. CBS agrees to collect two samples at this location (8.0-8.5 feet below ground surface (bgs) and a deeper sample to be selected at the time of sampling). Two additional borings east of BW1-3 will be completed. Two samples for VOCs will be collected from each boring in accordance with your letter.

Upon receipt of NRC clearance, demolition of Buildings 7 and 8 will be performed. CBS is proposing to initiate the groundwater and soil investigations we have agreed upon after demolition. CBS will submit a schedule to perform the agreed upon activities when we receive NRC clearance. If you should have any questions, please contact Mr. Kenneth Bird at 412/642-3287.

Sincerely,

Richard K. Smith
Director
Environmental Remediation

Kenneth J. Bird
Project Engineer/Consultant
