Rockville, MD 20852-2738

Dear Ms. Bennington,

Later this year, we plan to participate in the transport of foreign research reactor spent fuel transports destined to the Department of Energy's Savannah River Site.

These shipments will enter the United States at the Charleston Naval Weapons Station in Goose Creek, SC and be transported by rail to the Savannah River Site.

Please provide us with copies of the current U.S. NRC approved rail routes for these transports. We understand that the more direct route number desired is No. 185. Please also provide the alternate rail route, which includes transport through the State of Georgia as well as South Carolina.

Thank you in advance for your attention with this request.

Very truly yours,

Norman Ravenscroft  
President
