

DOCKET NO. 72-2

APPLICANT: Virginia Electric and Power Company

INSTALLATION: Surry Independent Spent Fuel Storage Installation
Surry Power Station, Surry County, Virginia

SUBJECT: CATEGORICAL EXCLUSION UNDER THE PROVISION OF 10 CFR 51.22(c)(11)

By letter dated November 16, 1987, Virginia Electric and Power Company requested an amendment of Materials License No. SNM-2501, Technical Specification 1.4 and 1.4.1 of Appendix C. The request asks to change an annual report, specifically the Surry Power Station Radiological Environmental Annual Operating Report, to a semi-annual report, specifically the Surry Power Station Semi-Annual Radioactive Effluent Release Report, which contains the required information. The change does not alter the original intent of the license Technical Specification, but is being requested to coincide and be consistent with existing requirements, pursuant to 10 CFR 50.36a(a)(2), for the Surry Power Station. The amendment also corrects a typographical error; an administrative inconsistency between 10 CFR 72.33(d)(3) and the Technical Specifications.

The staff has concluded that this revision is of an administrative, organizational, and procedural nature, and does not involve any changes in the scope or type of operations presently authorized by the license. Further this revision meets the conditions that (i) there is no significant change in the types or significant increase in the amounts of effluents that may be released offsite, (ii) there is no significant increase in individual or cumulative occupational radiation exposure, (iii) there is no significant construction impact, and (iv) there is no significant increase in the potential for or consequences from radiological accidents.

Therefore, in accordance with 10 CFR 51.22(c)(11), an environmental assessment or an environmental impact statement is not warranted for this action.
