

## UNITED STATES NUCLEAR REGULATORY COMMISSION

DOCKET NO. 72-2 (50-280 and -281)

VIRGINIA ELECTRIC AND POWER COMPANY

## NOTICE OF ISSUANCE OF AMENDMENT TO MATERIALS LICENSE SNM-2501

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 2 to Materials License No. SNM-2501 held by the Virginia Electric and Power Company for the receipt and storage of spent fuel at the Surry Independent Spent Fuel Storage Installation, located on the Surry Power Station site, Surry County, Virginia. The amendment is effective as of the date of issuance.

The amendment revises the Technical Specifications to change the environmental reporting requirement to coincide and be consistent with existing requirements for the Surry Power Station. It also corrects a typographical error; an administrative inconsistency between the Commission's regulations and the Technical Specifications. The changes do not alter the intent of the Technical Specification nor any safety margins.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter 1, which are set forth in the license amendment. Prior public notice of the amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of the amendment will not result in any significant environmental impact and that, pursuant to 10 CFR §51.22(c)(11), an environmental assessment need not be prepared in connection with issuance of the amendment.

For further details with respect to this action, see (1) the application for amendment dated November 16, 1987, and (2) Amendment No. 2 to Materials License No. SNM-2501, and (3) the Commission's letter to the licensee dated January 27, 1988. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the Local Public Document Room at the Swem Library, College of William and Mary, Williamsburg, Virginia, 23185.

Dated at Rockville, Maryland, this 27<sup>th</sup> day of January 1988.

FOR THE U.S. NUCLEAR REGULATORY COMMISSION

~~CONFIDENTIAL~~  
Leland C. Rouse, Chief  
Fuel Cycle Safety Branch  
Division of Industrial and  
Medical Nuclear Safety
