Subject: Radioactive contamination Meeting Jan 17 Huron Ohio

1/11/06
71FR 1776

(1)

I was employed by NASA Plumbrook Station. 1960-1972. Prostate cancer (removed), 1992.

In 2001, I was diagnosed with Hairy Cell Leukemia which is a rare form of cancer. I was one of 440 people in the USA diagnosed with HCL. My spleen was removed. It is reported that people under 60 get HCL, I was 78!!!! After chemo therapy etc, I have been released as in remission. Could it be possible that this was caused by the radiation at Plumbrook during the years that I worked there?

There will be a meeting from 5 to 7 pm at the Bowling Green University Campus in Huron, Ohio Jan. 17 2006, pertaining to radiation at Plumbrook Station, Sandusky Ohio.
