 Washington, DC 20555-0001

January 18, 2006 (4:00pm)

OFFICE OF SECRETARY
 RULEMAKINGS AND
 ADJUDICATIONS STAFF

Dear Secretary, Rulemakings and Adjudications, U.S. Nuclear Regulatory Commission,

The Nuclear Regulatory Commission (NRC) is proposing to do nothing to increase the security around nuclear reactors in America. Why?

In these days of terrorism and given the fact that nearly every world country hates the United States, nuclear reactor security must be THE number one funding priority i Congress.

After 9/11, Congress asked the NRC to consider funding for security upgrades in their next budget. The NRC has yet to act on the will of Congress.

The time has come now that Congress stop just suggesting things to the NRC. The time has come for Congress to DEMAND and MANDATE significant NRC security upgrades.

If the wind blows the right direction, a terrorist attack on Hanford in Washington state could affect us here in north Idaho.

The NRC proposal for security improvements are nothing but meaningless word. They are ambiguous, and vague.

I very much support the Committee to Bridge the Gap Petition for Rulemaking to upgrade reactor security. I implore you to support it too.

I also ask you to get tough with the top management of the NRC. They should be told to do their job or you will find someone who will!

Sincerely,

Richard Artley
