Secretary U.S. Nuclear Regulatory Commission ATTN: Rulemakings and Adjudications Staff

January 18, 2006 (4:00pm)

Dear Secretary ATTN: Rulemakings and Adjudications Staff,

OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

As a citizen who lives within 5 miles of Indian Point, I believe my input carries great weight. In any decisions with respect to the Design Basis Threat of nuclear power plants, it is essential that plants be able to repel an attack of at least as great as the 17 coordinated terrorists working in 4 groups that attacked on 9/11/01. In addition, basic security at plants need to include beamhenge protection. Also, dry cask storage must be protected through separation (50 year minimum spacing between each cask), beamheng, and burial in earthen mounds.

Sincerely,

Mark Jacobs
