Supplement to 60-Day Response to Bulletin 2003-01, "Potential Impact of Debris Blockage on Emergency Sump Recirculation at Pressurized-Water Reactors"

- References:
- 1) Letter from NMC to NRC dated August 8, 2003 (NRC 2003-0068)
  - 2) Letter from NMC to NRC dated May 14, 2004 (NRC 2004-0050)
  - 3) Letter from NMC to NRC dated August 19, 2005 (NRC 2005-0106)
  - 4) Letter from NMC to NRC dated October 18, 2005 (NRC 2005-0134)
  - 5) Letter from NMC to NRC dated December 19, 2005 (NRC 2005-0155)

In Reference 1, Nuclear Management Company, LLC (NMC), provided the 60-day response to Bulletin (BL) 2003-01, "Potential Impact of Debris Blockage on Emergency Sump Recirculation at Pressurized-Water Reactors," for the Point Beach Nuclear Plant (PBNP). References 2 through 4 supplemented the response. Reference 5 committed to providing a supplement to the 60-day response by January 21, 2006.

On January 10, 2006, NMC received a request for additional information (RAI) associated with a 10 CFR 50.46 emergency core cooling system long-term cooling effects event notification reported to the Commission via Emergency Notification EN 42129. The 60-day Licensee Event Report (Reference 5) was submitted on December 19, 2005. As a result of the receipt of this information request, it is appropriate that the NMC response to both requests be coordinated as the issues are inter-related. Accordingly, the BL 2003-01 supplemental response commitment date is modified as noted below.

Summary of Commitments

This letter contains one revised regulatory commitment as follows:

NMC will supplement the 60-day response to NRC Bulletin 2003-01 by February 24, 2006.

If you have any questions or desire further information regarding the subject matter of this letter, please contact me at (920)755-7624.
