Ms. Gloria Bennington
 U.S. Nuclear Regulatory Commission
 Division of Safeguards and Transportation
 Mail Stop 0-6F-18
 Washington, DC 20555

Dear Ms. Bennington,

As discussed earlier, we will be managing a shipment of spent foreign research reactor fuel from the Charleston Naval Weapons Station, Charleston, SC to the DOE Savannah River Site near Aiken, SC later this year.

The transport will be by rail. We understand that a valid approval for this port and route is in place. We wish to use the existing Route Plan for our planned shipment.

Please provide us with authorization to use this port and Route Plan as well as a copy of the current Route Plan.

Thank you for your continued cooperation.

Very truly yours,

Norman Ravenscroft
 President
