U.S. Nuclear Regulatory Commission
Division of Safeguards and Transportation
Mail Stop 0-6F-18
Washington, DC 20555

Dear Ms. Bennington,

On April 25, 2001, we requested authorization to use the existing rail route plan for shipments of spent fuel from the Charleston Naval Weapons Station to DOE at the Savannah River Site.

It now appears that one of the planned casks (TN6-3) may not be authorized for rail shipment and may need to be transported by highway.

Please let us know if there is a valid highway route plan for shipments between these points. If one is in place, please provide us with a copy of the plan along with authorization to use the plan.

Very truly yours,

Norman Ravenscroft
President
