Re: Proposed Rulemaking, RIN3150-AH60 To whom it may concern:
Again, The NRC has shown that it is incapable of protecting the American people, as it's mandate stipulates as it's reason for being. By not following all of the strategies outlined in the Nuclear Information Resource Services (NIRS) comment, to actually strengthen security at every nuclear plant by putting a shield around each facility capable of withstanding the direct hit of the largest airplane built, you have shown that it is either impossible to protect against this potential threat, or that the NRC is incapable or unwilling to do the job that it was created to do.

Since this is the case, the only practical solution is to Shut Down every operating nuclear plant, place all of the spent fuel in the enclosed containment buildings, and desist from any further construction of any nuclear facilities. Submitted this 23rd day of January, 2006. Jeannine Honicker P. O. Box 637, LaGrange, Ga. 30241 djhonicker@msn.com
