Secretary, NRC
Fax 310-415-1011

Dear Sir,

I am very concerned about protecting nuclear reactors from terrorist attack, which if successful could release massive radioactivity, capable of producing tens of thousands of immediate deaths and hundreds of thousands of latent cancers, as well as contaminating an area the size of a big state for generations.

I support the Committee to Bridge the Gap Petition for Rulemaking to upgrade reactor security.

19 attackers were involved in 9/11. It is not acceptable to require protection for a smaller number than that.

Congress has ordered NRC to include in any rulemaking consideration of 9/11-level threats, attacks by large groups, and attacks by air.

You have a tremendous responsibility to the residents of our country. Please don't let us down.

Sincerely,

Ted Williams
