Subject: Reactor Safety RIN 3150-AH60

OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

Dear NRC,

I'm writing as a concerned citizen who feels that it is my responsibility to point out to you that nuclear power plants are inadequately protected against terrorist attack. Since the NRC is funded almost entirely by the nuclear industry it is not surprising that safety issues in general and anti terrorist measures in particular are considered as a budgetary issue rather than a public health and safety concern. What will it take before you act in a responsible way to address the real threat of a terrorist attack on a nuclear facility?

63

Another concern I have is the way that university reactors are left with virtually no security protecting the cooling pools and fusible material from public access. What has the NRC done to address this problem?

Michael Bock
