**Subject:** License condition related to the ACP's final design

Brian,

Earlier today, I informed Pete Miner of USEC that we need to apply the following license conditions to the ACP concerning process safety information and ISAs:

1. "As the final design is developed for the ACP, USEC's management system and design approach will require that process safety information be updated as appropriate. Such updates will be completed prior to the NRC's conduct of its inspections involving process safety information that are required by 10 CFR 70.32(k)."

2. "As the final design is developed for the ACP, the management system and design approach will require that the ISA and ISA Summary be updated as appropriate and the final designs be reviewed against the ISA to ensure the ISA is bounding. Such ISA and ISA Summary updates and final design reviews against the ISA will be completed prior to the NRC's conduct of its inspections involving the ISA and ISA Summary that are required by 10 CFR 70.32(k)."

Pete indicated that the conditions appeared reasonable and, as such, would be acceptable to USEC.

Yawar
