

SUMMARY OF INFORMATION COLLECTION REQUEST

Title: NRC Form 7, "Application for NRC Export/Import License, Amendment or Renewal" (Draft OCP)

Current Burden/Responses: 599 hours/240 responses

Proposed Burden/Responses: 788 hours/319 responses

Frequency of Response: On occasion; for each separate export, import, amendment, or renewal license application, and for exports of incidental radioactive material using existing general licenses.

Number of Respondents: 319

Reasons for Changes in Burden/Responses:

There is no change in the burden of an average of 2.4 hours to complete the revised NRC Form 7. Respondents do not complete the entire NRC Form 7, only applicable sections depending on the nature of their license request. The burden for imports, exports of production or utilization facilities, amendments and renewal applications submitted by letter for 10 CFR Part 110 under OMB Clearance Number 3150-0036 is estimated at one hour per response. However, because the information is similar to the information required to be submitted currently on NRC Form 7, staff has re-estimated the burden for these respondents at 2.4 hours per response. The total annual respondents have increased from 240 to 319, and the burden has increased from 599 to 788 hours for NRC Form 7 in this clearance package to include the 76 additional responses for imports, exports of production or utilization facilities, amendments and renewal applications previously reported by letter under 10 CFR Part 110 (OMB Clearance Number 3150-0036).

Level of Concurrence:

Deputy Director
Office of International Programs

Recordkeeping Requirements in Accordance with the Retention Periods for Records Rule:

Not applicable.

Abstract:

Persons in the U.S. wishing to export or import nuclear material and equipment requiring a specific authorization, amend or renew a license, or wishing to use existing NRC general licenses for the export of incidental radioactive material over 100 kilograms must file an NRC Form 7 application. The NRC Form 7 application will be reviewed by the NRC and by the Executive Branch, and if applicable statutory, regulatory, and policy considerations are satisfied, the NRC will issue an export, import, amendment or renewal license. The form has been revised so that application information, previously submitted by letter under Part 110 will now be submitted on NRC Form 7.
