

January 27, 2006

Mr. Richard Montgomery
Advisory Engineer
Framatome
P.O. Box 11646
Lynchburg, VA 24506-1646

SUBJECT: CERTIFICATE OF COMPLIANCE NO. 9203 FOR THE MODEL NO. DHTF
PACKAGE

Dear Mr. Montgomery:

As requested by your application dated October 5, 2005, as supplemented January 20, 2006, enclosed is Certificate of Compliance No. 9203, Revision No. 14, for the Model No. DHTF package. Changes made to the enclosed certificate are indicated by vertical lines in the margin. The staff's Safety Evaluation Report is also enclosed.

Those on the attached list have been registered as users of the package under the general license provisions of 10 CFR 71.17 or 49 CFR 173.471. The approval constitutes authority to use the package for shipment of radioactive material and for the package to be shipped in accordance with the provisions of 49 CFR 173.471.

If you have any questions regarding this certificate, please contact me or Jessica Umana of my staff at (301) 415-8500.

Sincerely,

/RA/

Robert A. Nelson, Chief

SAFETY EVALUATION REPORT
Docket No. 71-9203
Model No. DHTF Package
Certificate of Compliance No. 9203
Revision No. 14

SUMMARY

By application dated October 5, 2005, as supplemented January 20, 2006, Framatome ANP (FANP or the applicant) requested a renewal and an amendment to Certificate of Compliance No. 9203, for the Model No. DHTF package. The applicant submitted a consolidated application for the package. Minor changes were made throughout the certificate to revise wording and to update references to the regulations. FANP did not request any changes to the package design or authorized contents. The certificate has been renewed for a five year term.

EVALUATION

FANP requested a renewal and amendment of Certificate of Compliance No. 9203 for the Model No. DHTF package on October 5, 2005. In support of the renewal request, FANP provided a consolidated application on January 20, 2006, as specified in 10 CFR 71.38(c). The staff reviewed the consolidated application and concluded that the application incorporated the changes to the Safety Analysis Report that were previously referenced in the Certificate of Compliance. The amendment request was to correctly reference the latest revision number of Drawing No. 1249874E on the certificate. Condition No. 6 was revised to reflect this change. FANP did not request any changes to the package design or authorized contents.

Condition No. 5(c) of the certificate was revised to delete the wording "Transport Index for Criticality Control" and "Minimum transport index to be shown on label for nuclear criticality control." The deleted wording was replaced with "Criticality Safety Index" as defined in 10 CFR 71.4.

Condition No. 11 clarifies that the package is approved for use under the general license provisions of 10 CFR 71.17. This change is due to a revision in the numbering of the section in 10 CFR Part 71, which became effective on October 1, 2004 (69 FR 3698).

The certificate was revised to include Condition No. 12, which authorizes use of the previous revision of the certificate for a period of approximately one year.

The staff reviewed the documents referenced in the certificate and determined that the documentation was available and complete.

CONCLUSION

The certificate has been renewed for a five-year term that expires on February 28, 2011. This change does not affect the ability of the package to meet the requirements of 10 CFR Part 71.

Issued with Certificate of Compliance No. 9203, Revision No. 14,
on January 27, 2006.
