Subject: RAI, Metuchen Nuclear Cardiology Services, PA Termination

License No.:29-30154-01
Docket No:03033550
Control No: 138169

Dear Ms. Clisura,

This is in reference to facsimile dated 1/27/2006, providing additional information to terminate Nuclear Regulatory Commission License No. 29-30154-01. In order to continue our review, we need the following information:

1) Please provide a signed copy of Mr. Robert J. Takarz, M.S., DABR Medical Physicist letter dated January 16, 2006.

2) Please provide a mailing address for all future correspondence regarding this license.

3) The Sealed Source Leak Test of December 14, 2005 and July 31, 2005 lists a Cs-137 rod source. Please explain the rod source results and who owns the source.

4) The results of your test on the Ludlum Model 2200 scalar and NaI well-type detectors indicates an unexplained bias in your counting system. Please determine the cause of the bias, explain the cause of the bias, and its effect on your survey results or perform another survey after the bias has been corrected. Alternatively, if only short half life materials were used at the facility, you may state the unsealed NRC regulated isotopes used during the life of the facility, the date when licensed activities ceased, and this may demonstrate that no residual contamination could remain above screening values.

We will continue our review upon receipt of this information. Please reply to my attention at the Region 1 Office and refer to Mail Control No. 138169. If you have any technical questions regarding this e-mail, please call me at (610) 337-5366.

Please note that you may not reply to this letter by return e-mail. Your reply must be in writing by letter or facsimile (610-337-5269). If we do not receive a reply from you within 30 calendar days from the date of this e-mail, we will assume that you do not wish to pursue your application.
