(4)

Good morning,

I have these comments.

page x

Change "Table 2-12. Mayor Employers.." to "Table 2-12. Major Employers.."

page 8-45, Section 8.2.5.10 Delayed Retirement

It is my recollection that fossil plants are designed with a life of either 60 or 65 years, not the 40 years mentioned here.

pages A-25 and A-25

Can the presently existing 115 kV offsite power support an accident in one unit and orderly shutdown and cooldown of the remaining two units? Apparently this is required by General Design Criteria 5, according to this comment. I note that "these comments have been referred to the NRC operating plant project manager for disposition."

Until these comments have been completely addressed, I do not feel it is appropriate to extend the license of these plants.

page G-21

I see a note 2 but am not able to identify what item(s) it refers to. In any event, why aren't the compensatory measures already in procedures, and when will they be?

Thank you for the opportunity to make these comments.

Tom Gurdziel
