Subject: Dr. Weisfogel license termination

This is a response to the email from Dennis Lawyer of the NRC to Desiree Clisura regarding the termination of the radioactive material license 29-30154-01.

No decommissioning funding plan is required because a cesium-137 sealed source with an activity of 134 microcuries was the only radioactive material on site. The activity is less than $10E5$ times the quantity stated in Appendix B of 10CFR30.35.

No records are required because there was no possession of radioactive material with a half-life greater than 120 days in unsealed form.

As for the survey submitted, the counts are as stated. There was no error or malfunction of the counting system. As a test, I counted background and 10 empty tubes with a Ludlum Model 2200 scaler and NaI well-type detector. Again the background was greater than each sample count. With a counting efficiency of 83%, the gross count would have to exceed 2400 cpm for a level 1 contamination of $2000\text{dpm}/100\text{cm}^2$.

A. LICENSE STATUS (Check the appropriate box)

This license has expired. This license has not yet expired; please terminate it.

B. DISPOSAL OF RADIOACTIVE MATERIAL
(Check the appropriate boxes and complete as necessary. If additional space is needed, provide attachments)

The licensee, or any individual executing this certificate on behalf of the licensee, certifies that:

1. No radioactive materials have ever been procured or possessed by the licensee under this license.

2. All activities authorized by this license have ceased, and all radioactive materials procured and/or possessed by the licensee under this license number cited above have been disposed of in the following manner.

a. Transfer of radioactive materials to the licensee listed below:

b. Disposal of radioactive materials:

1. Directly by the licensee: (All used unit doses were returned to vendor.
(2) All radioactive waste was stored for decay & then disposed of.
(3) Sealed source sent via FedEx to Isotope Products. (see attached)

2. By licensed disposal site:

3. By waste contractor:

c. All radioactive materials have been removed such that any remaining residual radioactivity is within the limits of 10 CFR Part 20, Subpart E, and is ALARA.

C. SURVEYS PERFORMED AND REPORTED

1. A radiation survey was conducted by the licensee. The survey confirms:

a. the absence of licensed radioactive materials

b. that any remaining residual radioactivity is within the limits of 10 CFR 20, Subpart E, and is ALARA.

2. A copy of the radiation survey results:

a. is attached; or b. is not attached (Provide explanation); or c. was forwarded to NRC on: _____ Date

3. A radiation survey is not required as only sealed sources were ever possessed under this license, and

a. The results of the latest leak test are attached; and/or b. No leaking sources have ever been identified.
