DOCKETED  
USNRC

February 1, 2006 (8:30am)

OFFICE OF SECRETARY  
RULEMAKINGS AND  
ADJUDICATIONS STAFF

Secretary, U. S. N. R. C.,

Dear Sir, Madam,

Since your number one job is making nuclear power plants 100% safe, there is a feature needed to insure that.

The missing feature is a protective structure over a reactor building and fuel pool building. This structure would stop a 747 jet from going thru the roof of the fuel pool or going thru the containment structure over the reactor.

Also: Use what happened on 9-11-01 when making your new regulations. Because doing less would make it easy for terrorists to spoil our still beautiful country.

Thank you,

Peter Fox Sipp
