Subject: Re: 20.2002s

Claudia , Yes, Big Rock, Vermont Yankee, and Oyster Creek were the last ones from NRR, since 2002. Note: I am drafting a SER approving an amendment to the Vermont Yankee 20.2002 to allow more material than previously allowed. So, you could say that NRR has one in process.

Steve K

PS; I have the request from Mark Taggart to provide all NRR's 20.302s and 20.2002s, but it is low priority. If we get a NSDP or summer intern, I will have them work on it.

>>> Claudia Craig 03/23/05 01:55PM >>>

Question for you guys - our buddy Diane D'Arrigo called and wanted to know how many 20.2002s there have been since 2000. Since our data base is not finished, I pulled up the following ones on ADAMS:

Vermont Yankee - approved 6/01

Oyster Creek - approved in 12/01

Big Rock Pt. - approved in 6/01 and revised in 1/05

Haddam Neck - US Ecology - not yet approved

Haddam Neck - WCS - not yet approved

Yankee Rowe - not yet approved

Air Force - not yet approved

Merck - not yet approved

She thought that we had approved them for SONGS and Maine Yankee - I don't recall those. Do you know of any others? thanks much - once the data base is completed, it will eliminate these questions!
