Diane,

Based on the info I could gather, the following 20.2002s have been acted on or are currently under review (only from 2000 to present). This may not represent every 20.2002 due to the way that they may have been coded in ADAMS. I included the submittal date, approval date, and a description, if I could find it, of what the material was and where it went.

Vermont Yankee - requested 9/11/00, approved 6/01, on-site disposal of soil  
Oyster Creek - requested 12/19/00, approved 12/01, on-site disposal of dredged material  
Big Rock Pt. - requested 3/14/01, approved 2/5/02, demolition debris to a landfill  
Haddam Neck - submitted 9/16/04, under review, solid waste from decommissioning to US Ecology  
Haddam Neck - submitted 1/4/05, under review, solid waste from decommissioning to WCS  
Yankee Rowe - submitted 12/22/04, under review, solid waste from decommissioning to WCS  
Air Force - submitted 6/23/04, under review, four M-47 tanks containing depleted uranium rounds to US Ecology  
Merck - submitted 2/23/04, under review, soil to Model City Inadfill in New York  
Big Rock Pt. - requested 9/15/04, approved 1/19/05, demolition debris to a landfill in Bellevue, MI  
Vermont Yankee - submitted 10/4/04, under review, revision to previous authorization  
I hope this addresses your questions.
