TELEPHONE: (651) 634-5120

CALLER: George M. McCann, Senior Health Physicist
Decommissioning Branch
NRC, Region III, Division of Nuclear Material Safety

DATE OF CALL: February 2, 2006 (Thursday)

SUBJECT: DISCUSSION REGARDING NRC FINDINGS FOR THE 3M COMPANY'S
CHARACTERIZATION SURVEYS AT TWIN CITIES ARMY AMMUNITION
PLANT

Ms. Wolfe was contacted and advised that the NRC has completed review of the characterization surveys conducted by the 3M Company around its former radioactive source manufacturing site. Ms. Wolfe was advised that the NRC had reviewed the former licensee's survey data and made the determination that the areas adjoining the former site meet the NRC's unrestricted release criteria, and that they NRC would not pursue this issue any further. Ms. Wolfe was advised that she would receive a copy of the letter. Ms. Wolfe asked if this action could effect any further development by the City? I discussed the NRC unrestricted release criteria. Additionally, I clarified a point of confusion, that is, I explained to her that the area surveyed by 3M is part of the Minnesota National Guard's property located on the TCAAP site, and not part of the TCAAP site, which is being considered for future development.

Ms. Wolfe was asked if she had any questions or concerns. She indicated that there hasn't been much interest, since the public meeting held for the ATK license termination meeting. Ms. Wolfe was advised that she could contact me anytime should she have any questions.

Nothing further was discussed.
