DOCKET NUMBER
PROPOSED RULE 73
(70FR 67380)

1. We urge you to support Committee to Bridge the Gap petition for Rulemaking to upgrade reactor security. There should be protection against at least 19 attackers and construction of "Beamhenge" shields so planes crash into the shields, not the reactor facilities.

2. The NRC proposal of "protecting" the reactors is a joke. It's unacceptable to exempt air attacks and having 2 guards.

3. Public comment is important and by making secret deals with industry and then pretending to have comment period with no specifics damages ~~of~~ public confidence and public security.

4. We urge you to support Bridge the Gap's petition for Rulemakings to upgrade reactor protections by building Beamhenge and increasing the number of people. Bridge the Gap's petition will protect us against terrorist attacks by land or by air.

Thanks,

79
