SAFETY EVALUATION REPORT Model No. NUHOMS®-MP197 Package Certificate of Compliance No. 9302 Revision No. 1

SUMMARY

Certificate of Compliance No. 9302, Revision No. 0, was revised to include minor administrative changes throughout the certificate.

EVALUATION

The information listed in Section 3.a. of the certificate was revised to reflect an address change. Other minor formatting and editorial revisions were made throughout the certificate for consistency and clarification.

Condition No. 5(c) of the certificate was revised to delete the wording "Transport Index for Criticality Control" and "Minimum transport index to be shown on the label for nuclear criticality control." The deleted wording was replaced with "Criticality Safety Index" as defined in 10 CFR 71.4.

Condition No. 9 of the certificate was revised to clarify that the package is approved for use under the general license provision of 10 CFR 71.17. This change is due to a revision in the numbering of the section in 10 CFR Part 71, which became effective on October 1, 2004 (69 FR 3698).

The certificate was revised to include Condition No. 10, which authorizes use of the previous revision of the certificate for a period of approximately one year.
