

DOCKET NUMBER

PETITION RULE PROJ 35-18
(70FR 75752)

14

2-06-06

I support allowing any patient who receives RAI-131 therapy to stay in isolation in the hospital until levels are safe to be around young children and pregnant people. As the mother of two young children, it is imperative that we change these laws that will allow us to be safe and most importantly to keep our family at a safe distance from us. Not all doctors stress the importance of staying away and we leave this in individuals hands to police themselves. These individuals are dealing with the stress of being told they have cancer and are hypothyroid and might not make the best decisions under these circumstances.

Thank you,

Jami Shapiro
Papillary Thyroid Cancer Survivor
