Re: **Mail Control No. 138216**
License No. 06-28502-01

03031642

Dear Mr. McKinley:

I am writing in response to your letter dated January 17, 2006, addressed to William Glucksman, MD, President, Jefferson X-Ray Group, P.C.

It appears that your letter is in response to our notification to the Commission of our company name change. There seems to have been a misunderstanding of our request. There is no change of ownership and/or control of the company. There is simply a name change effective January 1, 2006. Our new name is "Jefferson Radiology, P.C." All addresses, phone numbers, contacts, etc, remain the same.

Per our telephone conversation earlier today, I have enclosed a copy of your letter and as you requested, have answered the eight questions, most of which do not apply.

If you have any questions or need further information, please call me at 860/291-6554.

Sincerely,

Joanne Corriveau
CPCS

Hartford, CT 06106

SUBJECT: JEFFERSON X-RAY GROUP, P.C., REQUEST FOR ADDITIONAL
INFORMATION CONCERNING APPLICATION FOR AMENDMENT TO
LICENSE, CONTROL NO. 138216

Dear Dr. Glucksman:

This is in reference to your letter dated January 6, 2006 requesting to amend Nuclear Regulatory Commission License No. 06-28502-01. In order to continue our review, we need the following additional information:

It appears from your letter that a possible change of ownership (control) has occurred. Licensees must provide full information and obtain NRC's *prior written consent* before transferring control of the license. Control of a license is in the hands of the person or persons who are empowered to decide when and how that license will be used. That control is to be found in the person or persons who, because of ownership or authority explicitly delegated by the owners, possess the power to determine corporate policy and thus the direction of the activities under the license. A transferee is an entity that proposes to purchase or otherwise gain control of an NRC-licensed operation. A transferor is an NRC licensee selling or otherwise giving up control of a licensed operation. Provide the following information concerning changes of control by the applicant (transferor and/or transferee, as appropriate). If any items are not applicable, so state.

- a. *N/A* Provide a complete description of the transaction (transfer of stocks or assets, or merger).
- b. *See Attached letter* Indicate whether the name has changed and include the new name. Include the name and telephone number of a licensee contact who NRC may contact if more information is needed.
- c. *N/A* Describe any changes in personnel or duties that relate to the licensed program. Include training and experience for any new personnel.
- d. *N/A* Describe any changes in the organization, location, facilities, equipment or procedures that relate to the licensed program.

- e. *N/A* Describe the status of the surveillance program (surveys, wipe tests, quality control) at the present time and the expected status at the time that control is to be transferred.
- f. *N/A* Confirm that all records concerning the safe and effective decommissioning of the facility will be transferred to the transferee or to NRC, as appropriate. These records include documentation of surveys of ambient radiation levels and fixed and/or removable contamination, including methods and sensitivity.
- g. *N/A* Confirm that the transferee will abide by all constraints, conditions, requirements and commitments of the transferor or that the transferee will submit a complete description of the proposed licensed program.
- h. *N/A* If your license requires financial assurance for decommissioning, you will need to address changes to financial assurance for name changes and/or change in ownership (control). If your company's name is changing and there is no change of ownership, you will need to amend your financial assurance instruments and supporting documents to address the change in name. If there has been a change of ownership (control), the transferee must submit new financial assurance in accordance with Chapter 4 to Volume 3 of NUREG-1757, "Consolidated NMSS Decommissioning Guidance."

Adam Lavin
Current NRC regulations and guidance are included on the NRC's website at www.nrc.gov; select **Nuclear Materials; Medical, Industrial, and Academic Uses of Nuclear Material**; then **Toolkit Index Page**. Or you may obtain these documents by contacting the Government Printing Office (GPO) toll-free at 1-888-293-6498. The GPO is open from 7:00 a.m. to 9:00 p.m. EST, Monday through Friday (except Federal holidays).

We will continue our review upon receipt of this information. Please reply to my attention at the Region I Office and refer to Mail Control No. 138216. If you have any technical questions regarding this deficiency letter, please call me at (610) 337-5102.

If we do not receive a reply from you within 30 calendar days from the date of this letter, we will assume that you do not wish to pursue your application.

Sincerely,

Richard McKinley
Health Physicist
Medical Branch
Division of Nuclear Materials Safety
