January 26, 2006

In reference to page 1774 Federal Register/  
vol 71, no 7 / Wednesday January 11, 2006, I would  
like to express my view as a concerned citizen.

The risk assessments in the draft safety  
Evaluation released by the NRC are based on the  
fallacious assumption that the reactor is brand  
new. The plant is NOT brand new, so these  
safety margins NO LONGER APPLY. For this  
and many other reasons, the risk assessments  
are seriously flawed. This is irresponsible  
and dangerous.

It seems obvious that an independent  
safety assessment needs to take place here so  
the NRC can truly evaluate the system.

Thank you for your attention.

Jill Bromberg
