

EFFLUENT MONITORING REPORT

FOR JANUARY - JUNE 1984

Licensee: Combustion Engineering, Inc.
Highway P
Hematite, Missouri 63047

License No. SNM-33

Docket No. 70-36

The following quantities of low-enriched uranium were released to unrestricted areas during the period January through June 1984:

Liquid ⁽¹⁾	7.06×10^{-3}	Curies (6.59×10^8 liters)
Gaseous ⁽²⁾	5.20×10^{-5}	Curies (0.98×10^{10} ft. ³)

(1) Measured at discharge of site pond to form site creek. Includes naturally occurring alpha-emitters present in the water.

(2) Particulate uranium compounds measured by continuous exhaust stack sampling.
